

LG ESS Home 8

Unpack the Home 8 Energy Storage System

The **LG Electronics Home 8 Energy Storage System** is an all-in-one sustainable energy solution designed with a grid-connected inverter, integrated battery, and innovative Smart Energy Box (SE Box) to protect from outages, rolling blackouts, peak energy shifts, and more.

With a built-in Power Management System included in the SE Box, Home 8 can monitor power usage and grid status, PV generation, consumer electricity plan, and weather forecast to provide optimal charging/discharging operation. And with the Automatic Transfer Switch function enabled, Home 8 can seamlessly switch to backup power during an outage.
